

This email is in regards to the work done by Diversified Interiors for the IDEA RIO VISTA campus, specifically the painting crew led by Mr. Mario Galvan. I, Ruben Rivera, on behalf of the VEMAC family, would like to formally thank and credit the crew for an outstanding job. Every member of this particular crew displayed an excellent attitude both towards the work required and with all subs both they and I had to coordinate with in order for DI to complete the task at hand. The level of initiative and quality of work (in my experience with painters) is unmatched. There have been times on the job site where coordination and levels of priority per room have changed and the output from your men continued in a seamless effort. This project began with a tight schedule and under the circumstances, your men shined throughout the entirety of their presence on the project. For this, and all tasks assigned to these men, I commend you and them.

It is because of this experience with DI and under the leadership of Mr. Galvan that I look forward to working with DI on future projects.

Should you have any questions on the matter please don't hesitate to call.

Respectfully,

Ruben Rivera

Construction Superintendent

VEMAC
